## PROFESSIONAL SUMMARY

Computer Science undergraduate specialising in Maritime Informatics at Universiti Malaysia Terengganu (UMT), Faculty of Computing and Mathematics. CGPA 3.34. Hands-on experience building web-based systems, IoT monitoring solutions, and database-driven applications using Java, Python, and modern web technologies. Fast learner with strong analytical thinking and a proven ability to work independently and within a team. Actively seeking IT internship opportunities to contribute to real-world software engineering environments.

## TECHNICAL SKILLS

|                               |                                                                                      |
|-------------------------------|--------------------------------------------------------------------------------------|
| <b>Programming:</b>           | Java, Python, C++, JavaScript                                                        |
| <b>Web Technologies:</b>      | HTML5, CSS3, JSP, Servlet, Bootstrap, Tailwind CSS, Laravel                          |
| <b>Databases:</b>             | MySQL, SQL (CRUD Operations, Schema Design)                                          |
| <b>Tools &amp; Platforms:</b> | Git, GitHub, VS Code, Eclipse, IntelliJ, Raspberry Pi Pico W, Microsoft Office       |
| <b>Core Strengths:</b>        | Problem Solving, Debugging, Analytical Thinking, OOP, MVC Architecture, Fast Learner |

## WORK EXPERIENCE

**Software Developer** — Universiti Malaysia Terengganu (Academic Project) Jul 2025 – Present

- Developed a web-based system for managing student violation records and user profiles.
- Designed and implemented features including profile management, summons tracking, and predictive analytics.
- Ensured data accuracy and system efficiency through structured MySQL database integration.
- Improved user interface design for better usability and overall system interaction.

**Committee Member** — COMTECH, Computer and Technology Student Club, UMT Jan 2025 – Present

- Managed and maintained digital platforms including social media and communication channels.
- Designed and developed digital content such as posters and promotional materials.
- Assisted in improving communication efficiency through digital solutions and team coordination.

## PROJECT EXPERIENCE

### UMT e-Summons System — Final Year Project (FYP)

**Technologies:** Java, JSP, Servlet, MySQL, GitHub, HTML, CSS

- Built a web-based summons management system for UMT using Java, JSP Servlet, and MySQL.
- Managed full development cycle: database design, back-end logic, and front-end UI.
- Implemented predictive analytics feature to identify patterns in student violation data.

### Real-Time IoT Flood Detection System

**Technologies:** Raspberry Pi Pico W, MicroPython, IoT Sensors, Web Dashboard

- Developed an IoT monitoring system using Raspberry Pi Pico W with a live web dashboard.
- Built backend server scripts and microcontroller code for real-time flood data collection.
- Connected hardware sensor data to a web interface for live monitoring and alerting.

### Bus Booking System — Group Project

**Technologies:** Java EE, MySQL, HTML, CSS

- Collaborated in a team to build a web-based bus booking management system.
- Implemented booking logic, user management, and database operations.

### UMPSA Hackathon — Participant

- Applied analytical and development skills to deliver a working solution under time constraints.
- Collaborated with team members across idea development, implementation, and presentation.

EDUCATION

---

Universiti Malaysia Terengganu (UMT)2023 – Present

Bachelor of Computer Science with Maritime Informatics (Honours) | Faculty of Computing and Mathematics

CGPA: 3.34 | Expected Graduation: October 2027

Coursework: Web Application Development · Software Project Management · Networking · IoT · Cybersecurity · Simulation & Modelling

Perak Matriculation College2022 – 2023

Biological Science (Matriculation) | CGPA: 3.17

CERTIFICATIONS & TRAINING

---

- UMPSA Hackathon — Universiti Malaysia Pahang Al-Sultan Abdullah
- Laravel Workshop

ADDITIONAL INFORMATION

---

Languages:English (Proficient — reading & writing), Bahasa Melayu (Fluent, native)

Strengths:Analytical thinking, fast learner, self-driven, structured debugging approach, team player

Availability:Open to internship opportunities; willing to relocate; based in Bagan Datuk, Perak
